

```
bool identical(Node *r1, Node *r2)
{
    if(!r1 && !r2)
        return 1;
    if(r1 && !r2 || !r1 && r2)
```

```
        return 0;
    if ( r1 -> data != r2 -> data)
        return 0;

    return identical(r1->left, r2->left) && identical(r1->right, r2->right);
}
```
